

LED Food Light Mounting Template / Instructions

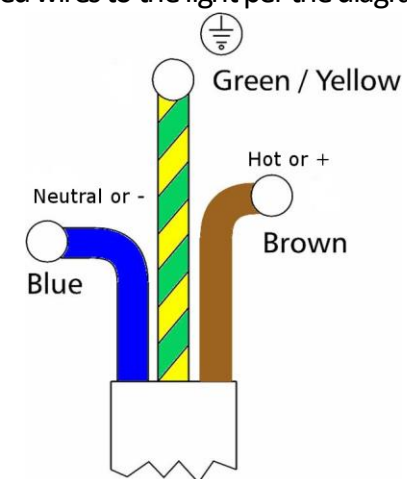

Template:

The black square represents the proper mounting hole for the LED Flood light.

Instructions:

- Using the template, mark the area for the light on the side of the trailer.
 - Make sure there are no obstructions on the other side of the intended opening.
 - Make sure there is no wiring or plumbing inside the wall you are going to cut.
- Drill holes in each corner. Then use a jigsaw or spiral saw to cut the opening.
- Attach the user supplied wires to the light per the diagram.

- Apply a bead of silicone caulking to the outside edge of the opening.
- Using the appropriate screws, attach the light to the wall
 - Be careful not to pinch the wires

Specifications:
